Subject: RE: Telephons provision

Sorry also, mobile phone reception is very poor. My wife uses O2 and used to have reliable and a good service . I use Vodafone and have never had any service. In the last year here service has become VERY poor, my son sent a test text on Sunday morning so only got it Monday as we went into Town.

Visitors here find it baffling telecommunications is so poor and declining. Indeed a BT engineer who normally worked in London was at his wits end dealing with it! The only place we find as bad is where we keep our caravan on a small Welsh farm many miles from a town. When our phone line wasn't working for many lengthy periods we at least were, then, able to use O2 now we don't even have that top fall back on.
